

# Broadband In-Motion

High Performance Mobile Satellite Solutions

## *Broadband In-Motion Solution For Demanding, Mission-Critical Tasks in Challenging Environments*

Kariba Systems' "Broadband In-Motion" mobile communication solutions are vehicle-mounted systems based on BGAN terminals, specially tailored for highly mobile professionals who demand constant connectivity to the internet even while they are on the move in their vehicle.

Kariba Systems provides mobile broadband solutions to professionals in various sectors. With global coverage and a variety of devices to select from, Kariba ensures you get the highest quality voice, data and video connection in any environment and location in the world.

Kariba only uses high quality portable BGAN terminals with full set of original accessories in its solutions.

BGAN service plans from Inmarsat with global coverage ensure that every customer's requirements are met.
