

# Flyaway Terminal

High Performance Mobile Satellite Solutions

**Flyaway Satellite Terminal Solution**  
*Designed for Vehicle Mounting or Temporary Ground Deployment*

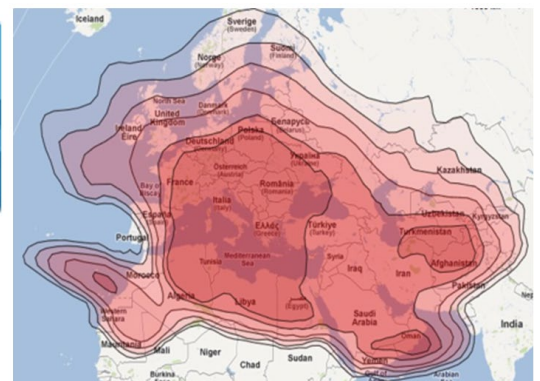

Kariba Systems' Flyaway Satellite Terminals are vehicle-mounted or case-based broadband terminals that use Ku and Ka frequency bands, specially designed to meet the needs of professionals across the board in all industries with requirement for high quality, wide bandwidth mobile satellite communication on demand.

Kariba Systems provides mobile broadband solutions to professionals in various sectors. With wide area coverage and a variety of terminals to select from, Kariba ensures you get the highest quality voice, data and video connection in any environment and location in the world.

Kariba only uses high quality flyaway vehicle-mounted and case-based terminals with full set of original accessories in its solutions.

Kariba Systems offers communication over Ka band by Hylas-2 satellite or Ku Band by Eutelsat satellite for ultimate performance for specific applications in EMEA Region.
